Lakeside-Astro Focuser - Revision History

Driver:
V1.0.0 - 31/03/2009
Original release
V1.0.1 - 14/03/2010
Changes to manual move routines
V1.0.2 - 29/03/2010
Changes for 64bit versions of Vista & Windows 7
V1.0.2a - 20/02/2011
Changes for dual operation. Second driver called LakesideAstro2
which will allow two focusers to be used simultaneously
Note, only works with V1.0.2a
V1.1.0 - 01/03/2011 * REQUIRES V1.1.x Firmware
Added temperature compensation
Added PC setup inc. temperature compensation via config form accessed from setup
Increased number of available COM ports from 9 to 16
V1.1.1 - 30/10/2011
Removed the .ini file to save COM port. Now use config file to overcome problem with non English language operating systems
09/05/2012
Note: 2nd driver called "LakesideAstro2" added for V1.1.1 (same driver but with a
different name)
to allow use of dual focusers with programs that support it
V2.0.0.0 - 01/03/2014
Updated driver to IFocuserV2. Changed to using ASCOM Profile for state storage
Note: 2nd driver call "LakesideAstro V2 Focuser 2" supplied to allow use of dual
focusers with programs that support it
Thanks to Peter Simpson who carried out most of this update
